

How to Add Pixabay API for Image Searches in AIMasher's Media Packs

1 Navigate to <https://members.aimasher.com/Account/Dashboard.aspx>

2 Click "Integrations"
Click "Pixabay"

The screenshot shows the AIMasher dashboard interface. On the left is a pink sidebar menu with options: Article Publisher, Content Engine, Blog Amplifier, Media Mixer, Integrations (highlighted with a yellow circle), FAQ, Support, and Admin. The main content area has a red header 'Articles in My Articles' with a count of 2109. Below this is a purple 'Integrations' section containing a table of active integrations. At the bottom is a yellow 'Data' section.

Integrations	
OpenAI	4 Accounts

Change Width:

API Key:

Is Safe Search:

Image Type:

Test

Keyword:

5 Switch to tab "Pixabay API Documentation" Copy Your API Key Press **ctrl + C**

Error Handling

If an error occurs, a response with proper HTTP error status code is returned. The body of this response contains a description of the issue in plain text. For example, once you go over the rate limit you will receive an HTTP error 429 ("Too Many Requests") with the message "API rate limit exceeded".

Search Images

<https://pixabay.com/api/> GET

Parameters

key (required)	str	Your API key: <input type="text" value="65514-58af646"/>
q	str	A URL encoded search term. If omitted, <i>all images</i> are returned. This value may not exceed 100 characters. Example: "yellow+flower"
lang	str	Language code of the language to be searched in. Accepted values: cs, da, de, en, es, fr, id, it, hu, nl, no, pl, pt, ro, sk, fi, sv, tr, vi, th, bg, ru, el, ja, ko, zh Default: "en"
id	str	Retrieve individual images by ID.
image_type	str	Filter results by image type. Accepted values: "all", "photo", "illustration", "vector" Default: "all"
orientation	str	Whether an image is wider than it is tall, or taller than it is wide. Accepted values: "all", "horizontal", "vertical" Default: "all"
category	str	Filter results by category.

6

Go back to the AiMasher tab and Click this text field.
Paste your Pixabay API key here [ctrl+v]
Then click Update to save and click Finish to exit the setup

The screenshot displays the AiMasher interface for configuring the Pixabay integration. On the left is a pink sidebar with navigation links. The main area is titled 'Pixabay' and contains the following form elements:

- ID: 2
- Description: Damon's Pixabay
- Change Width:
- API Key: 6551 (highlighted with a yellow circle and a red arrow labeled '1')
- Is Safe Search:
- Image Type: Photo
- Buttons: Update (labeled '2'), Finish (labeled '3')
- Test section: Keyword: DOGS, Search button

At the bottom of the form, there are five small image thumbnails.
